

# Incidence of malaria in Amboasary Sud District 2015-2018

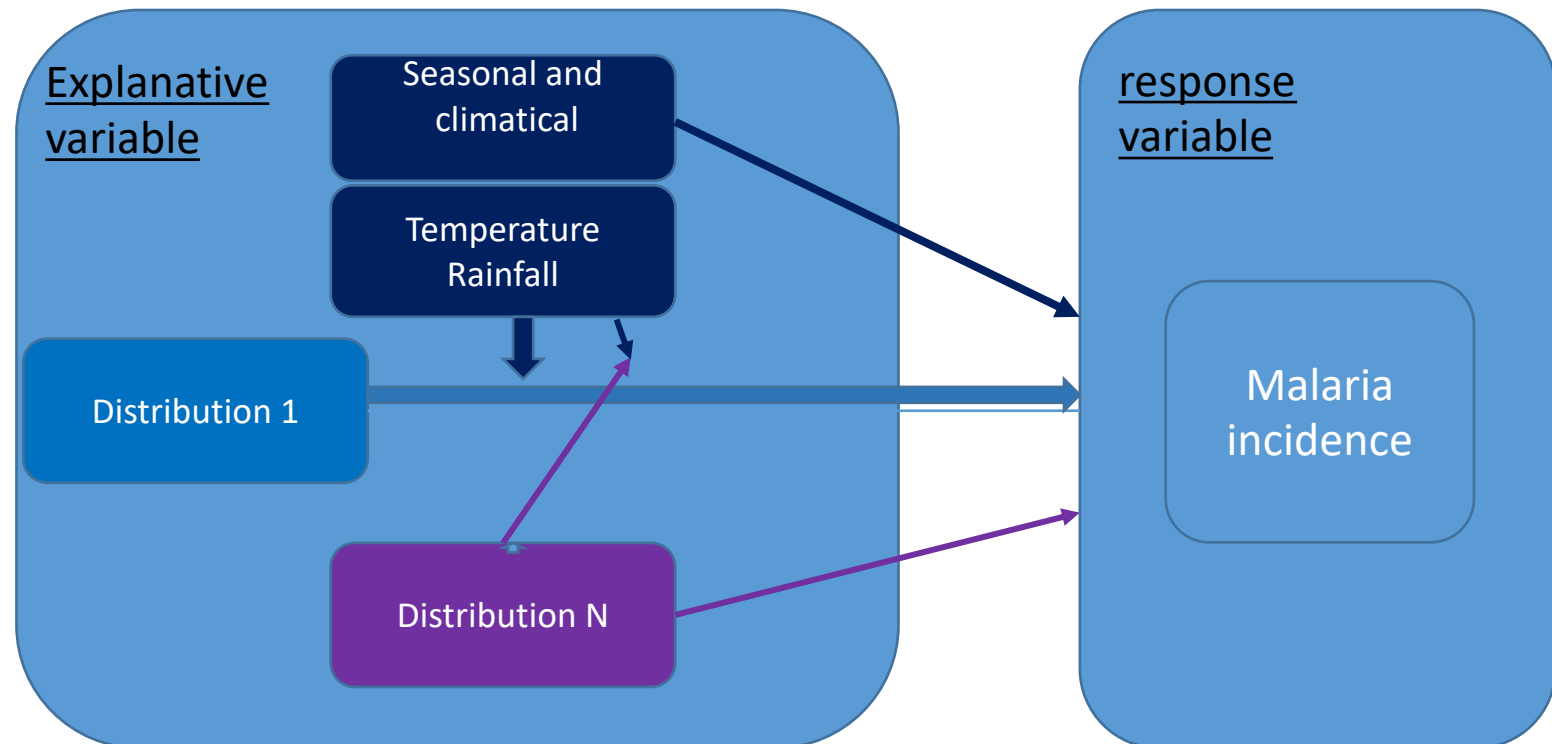

## Background

- Although, many interventions to fight against malaria, the burden of the disease stays high and increase in some districts → Amboasary Sud ;
- What is the effect of the distribution of sleeping nets on malaria incidence ?
- Mechanistic model question : how does temperature affect the malaria incidence.

# Statistical model

- **Question** : what is the effect of the distribution of sleeping nets on malaria incidence.
- **Methodology**: Generalized linear mixed model (Gaussian), link: log
- **R-function**: glmm
- **Result** : decreasing of malaria incidence.
- **Hypothesis** : nets distribution have a positive impact in decreasing malaria incidence.

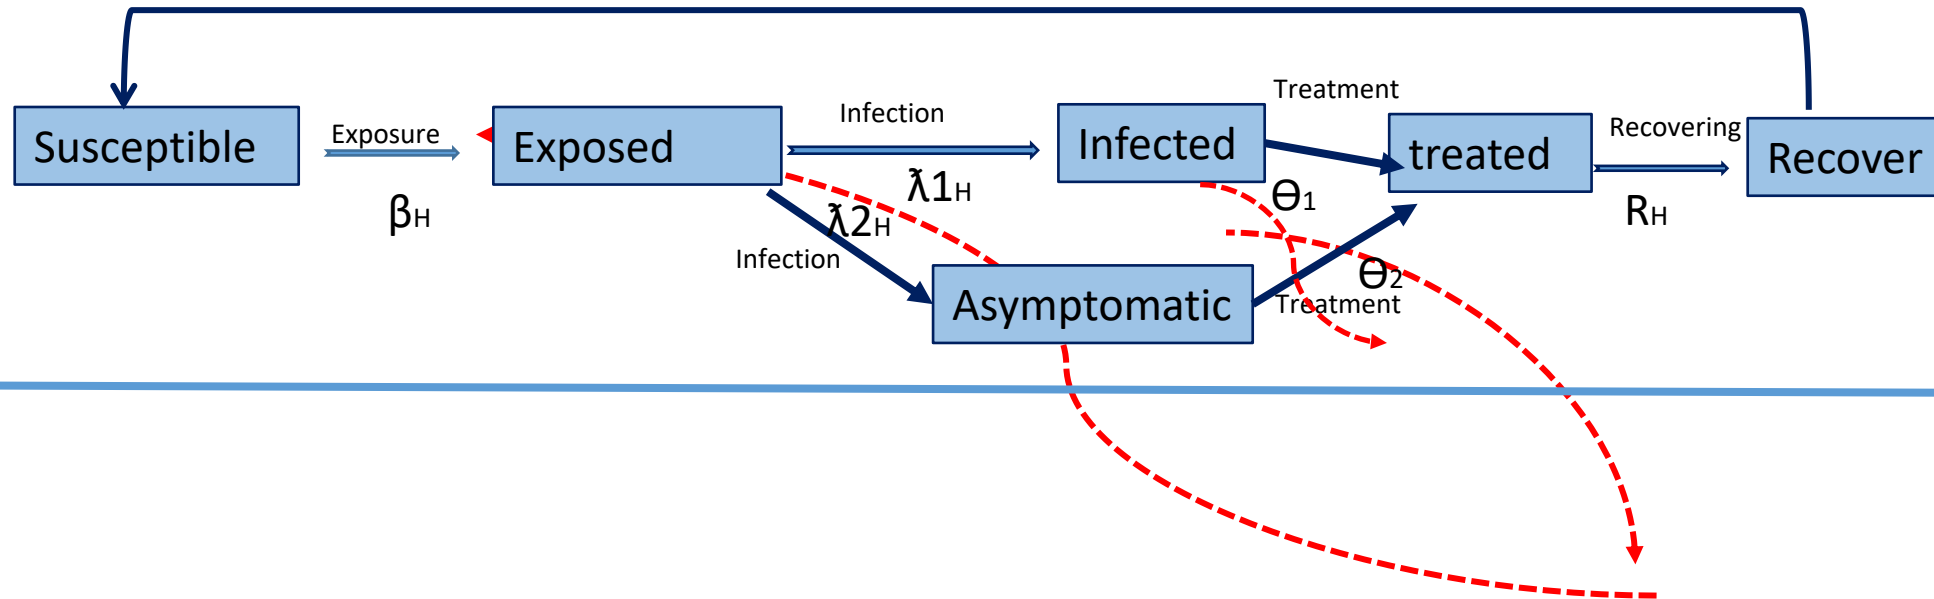

# Dynamical model

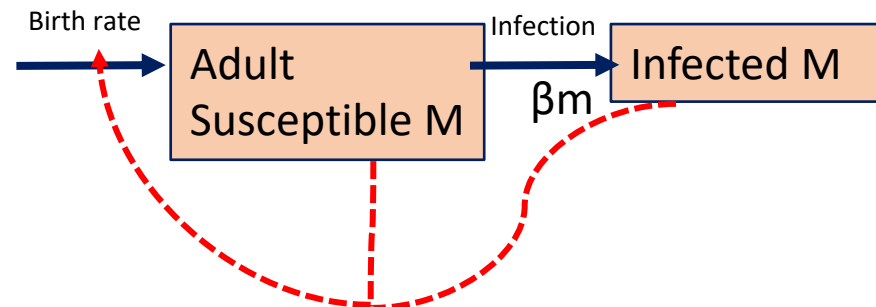

**Question :** How does temperature malaria incidence

Human

$\infty_H$

Mosquito

## Next step

- Entomological survey : mosquito density, vector behaviour ;
- Coverage of bed net and use (malaria indicator survey) ;
- More explanative variable : geographical and environmental.
